## **DETAILED ACTION**

### ***Specification***

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawanishi et al (US # 5,889,235) in view of Salmonsens et al (US # 4,344,493).  
Kawanishi discloses a weighing device in which a target object is put in a container and a conveyor weighing weighs the target object put in the container, and the target object is discharged while a container selected in a container stock unit is moved in a discharge unit is disclosed. In Kawanishi there is no clear description if the conveyor weighing weighs the target object put in the container without stopping the movement of the container. However, that the conveyor weighing weighs goods without stopping their movement is known in the art as shown by the example of Salmonsens; Therefore,

applying the non-stop weighing conveyer to the invention of Kawanishi is would have been obvious motivated by a need to increase throughput.

**Conclusion**

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randy W. Gibson whose telephone number is (571) 272-2103. The examiner can normally be reached on Mon-Fri., 9-5.
